

## Entaniya Fisheye

The NEW Entaniya ENTAPANO range of Fisheye lenses achieves unique wide-angle images well beyond a normal field of view. The lenses are designed for 360 degree image capture using cameras like the **Ribcage modified 1/2.3" CMOS GoPro**.

Standard 180 degree fisheye lens are not always able to capture the upper and lower aspects of an image which will be missing when converted into a panoramic image. The Entaniya ENTAPANO Fisheye lens range correctly resolves images at approximately 190° degrees enabling flawless, seamless panoramic images to be captured.

The current range covers 220°, 250° and 280°.

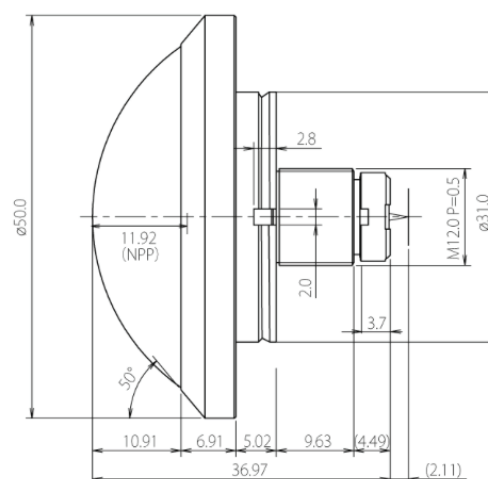

### Features:

- 1.38 mm lens
- 4K Resolution
- **PERFECT for GoPro Ribcage cameras**
- Integrates with 1/2.3" cameras
- Japanese lens technology & quality
- Weight 79 grammes
- Supplied with CS mount adapter, IR cut filter, Allen key and grub screws
- 220 and 280 degree lenses also available

### Specification:

Focal Length	1.38mm
Image Format	1/2.3"
Adjustment	Focus by adjusting the mount on the supplied CS-mount, 6 x locking grub screws
Maximum Aperture	F2.8 (Fixed)
Angle of View (HxV)	250° x 250°
Focussing Range	0.5m - ∞ (from Front of Lens)
Lens Elements	11 Elements ED x 1, SHR x 2
Image Circle	Diameter 5.5mm (250° x 250°) 1/2.3" : 250° x 195°
Minimum Object Distance	0.5m
Resolution	Suitable for 4K
Back Focal Length	2.3mm (in air) at infinity
Flange Focal Length	17.526mm (in air)
Mount	M12 S-mount (metal)
Weight (g)	79grammes
Dimensions	50mm (Diameter) x 37mm (Length)
Operating Temperature	-10 ~ +50°C (0 ~ +35°C recommended)
