**The new UPBLINK from CamDo is a time lapse controller now featuring flexible cloud upload schedules image upload to CloudX Pro.**

UpBlink is designed for use with GoPro Hero 5 Black, and is also compatible with the BackBone Ribcage modified Hero5 PRO camera. The system is easy to use and provides high quality 4K time lapse at a very cost effective price. A local WiFi network or a data hotspot is required for connection to the internet.

It has all the features and ease of operation as the CamDo Blink X. The intuitive web interface allows you to programme up to four separate schedules allow for photo, day, night, burst or video modes.

By removing the camera battery UpBlink can be used to reboot the camera in case of failure. UpBlink includes a 2.5mm jack input for a wired remote trigger and a 3.5mm jack connecting to a X-Band motion detector (coming soon).

COMING SOON - Motion Detection and the capability to work with GoPro Hero 6 & 7 cameras.

**UPBLINK CONTROLLER IS IDEAL FOR:**

**Construction Timelapse**

**Season Timelapse**

**Wildlife / Ocean / Glacier monitoring, etc**

**Film / Broadcast Timelapse**
