

UNDERWATER WiFi EXTENSION CABLES

CamDo
Connect more Do more

CamDo underwater WiFi extension cables extend the 2.4 GHz WiFi and Bluetooth signal to allow you to perform any camera function UNDERWATER that you could do on the surface!

The cable is attached to the camera underwater housing using the two pronged "GoPro" mount. There are four cables available with lengths from 7 - 90 metres long. A connector at the dry end can allow the cable to pass through a bulkhead.

The camera WiFi frequency must be set to 2.4 GHz (5 GHz will not work). To work effectively the cable receiver / transmitter **MUST** also be positioned close to the camera and the device on the surface.

Features:

- Suitable for WiFi enabled action cams with "GoPro" mount
- Tested to camera housing depth with no issue
- Quick and simple to use (no tools required)
- Cable splits for fitting through bulkhead
- Resistant to saltwater and harsh environments

Applications:

- Underwater filming
- Underwater inspection and monitoring
- Harsh environment use
- Underwater livestreaming

Specifications:

Operational Depth	Works to camera housing depth
Compatible Cameras	GoPro Range, Xiaomi Yi, Yi4K & Yi4K+, SJCAM Any action camera with 2 pin "GoPro" mount
Operating Frequency	2.4 GHz
Mounting	Camera - by GoPro mount Surface - velcro included

Options:

- CD-180288 7 metre (20') Weight 0.5KG
- CD-180289 15 metre (50') Weight 1.0KG
- CD-180290 38 metre (125') Weight 2.5KG
- CD-180291 90 metre (300') Weight 6.0KG
- CD-180285 Inspection Kit (see separate datasheet)
